INSIGHT
YEAR 12 Trial Exam Paper

2011
SPECIALIST MATHEMATICS
UNIT 4

Written examination 2
QUESTION AND ANSWER BOOK

STUDENT NAME:

Reading time: 15 minutes

Writing time: 2 hours

Structure of book

Section	Number of questions	Number of questions to be answered	Number of marks
1	22	22	22
2	5	5	58
Total			80

- Students are permitted to bring the following items into the examination: pens, pencils, highlighters, erasers, sharpeners, rulers, a protractor, set-squares, aids for curve sketching, once bound reference, one approved graphics calculator or CAS (memory DOES NOT need to be cleared) and, if desired, one scientific calculator.
- Students are NOT permitted to bring sheets of paper or white out liquid/tape into the examination.

Materials provided

- The question and answer book of 29 pages with a separate sheet of miscellaneous formulas.
- Answer sheet for multiple-choice questions.

Instructions

- Write your **name** in the box provided and on the multiple-choice answer sheet.
- Remove the formula sheet during reading time.
- You must answer the questions in English.

At the end of the exam

- Place the multiple-choice answer sheet inside the front cover of this book.

Students are NOT permitted to bring mobile phones or any other electronic devices into the examination.

This trial examination produced by Insight Publications is NOT an official VCAA paper for the 2011 Specialist Mathematics written examination 2. Every effort has been made to gain permission to reproduce any images herein; failure to do so is not intended to limit the rights of the owner.

This examination paper is licensed to be printed, photocopied or placed on the school intranet and used only within the confines of the purchasing school for examining their students. No trial examination or part thereof may be issued or passed on to any other party including other schools, practising or non-practising teachers, tutors, parents, websites or publishing agencies without the written consent of Insight Publications.

Section 1

Instructions for Section 1

Answer **all** questions in pencil on the answer sheet provided for multiple-choice questions.

Choose the response that is **correct** for the question.

A correct answer scores 1, an incorrect answer scores 0.

Marks will **not** be deducted for incorrect answers.

No marks will be given if more than one answer is completed for any question.

Take the **acceleration due to gravity** to have magnitude $g \text{ m/s}^2$, where $g = 9.8$.

Question 1

The graph of $y = f(x)$ is shown below.

Which of the following graphs could be its antiderivative $F(x)$?

A.

B.

C.

D.

E.

**Question 2**

The graph of the function $f(x) = ax + \frac{b}{x^2}$, where $a < 0$ and $b > 0$, must have

- A. one asymptote and a local minimum at $x = \left(\frac{b}{2a}\right)^{\frac{1}{3}}$
- B. one asymptote and a local maximum at $x = \left(\frac{b}{2a}\right)^{\frac{1}{3}}$
- C. two asymptotes and a local minimum at $x = \left(\frac{b}{2a}\right)^{\frac{1}{3}}$
- D. two asymptotes and a local minimum at $x = \left(\frac{2b}{a}\right)^{\frac{1}{3}}$
- E. two asymptotes and a local maximum at $x = \left(\frac{b}{2a}\right)^{\frac{1}{3}}$

Question 3

Which one of the following relations has a pair of asymptotes with an angle of $\frac{\pi}{3}$ between them?

- A. $2(x-2)^2 - (y+1)^2 = 1$
- B. $3(x-2)^2 - (y+1)^2 = 1$
- C. $(x-2)^2 - 3(y+1)^2 = 3$
- D. $3(x-2)^2 + (y+1)^2 = 3$
- E. $x^2 - 4x - 2y^2 + 1 = 0$

Question 4

The position vectors of two particles, P and Q , are given by

$$\underline{p} = (5t-3)\underline{i} + t^2\underline{j} \text{ and } \underline{q} = 7\underline{i} + (5t-6)\underline{j}, t \geq 0.$$

The two particles will collide when

- A. $t = 3$
- B. $t = 6$
- C. $t = 2$ and $t = 3$
- D. $t = 2$
- E. $t = 2$ and $t = 6$

Question 5

The velocity of an object at time t seconds is given by $\underline{v}(t) = 2t\underline{i} + 5\underline{j} - \frac{4}{(t+1)^2}\underline{k}$.

When $t = 1$ the position of the particle is $\underline{r}(t) = 2\underline{i} + 3\underline{j} + \underline{k}$.

The initial position of the object is given by

- A. $\underline{i} + 2\underline{j} - \underline{k}$
- B. $2\underline{i} + 3\underline{j} - 6\underline{k}$
- C. $\underline{i} - 2\underline{j} - 3\underline{k}$
- D. $2\underline{i} + 2\underline{j} - \underline{k}$
- E. $\underline{i} - 2\underline{j} + 3\underline{k}$

Question 6

The value of the constant p for which the vectors $\underline{u} = 2\underline{i} - \underline{j} + 3\underline{k}$, $\underline{v} = -\underline{i} + \underline{j} - 2\underline{k}$ and $\underline{w} = p\underline{i} + 3\underline{j} - 3\underline{k}$ are linearly dependent is

- A. ☐ 1
- B. 1
- C. 0
- D. 2
- E. ☐ 2

Question 7

The vector resolute of $\underline{a} = 2\underline{i} - \underline{j} + \underline{k}$ that is perpendicular to $\underline{b} = 3\underline{i} + 2\underline{j} - 2\underline{k}$ is

- A. $\frac{1}{3}(2\underline{i} - \underline{j} + \underline{k})$
- B. $\frac{7}{17}(4\underline{i} - 3\underline{j} + 3\underline{k})$
- C. $\frac{2\sqrt{17}}{17}$
- D. $\frac{2}{17}(3\underline{i} + 2\underline{j} - 2\underline{k})$
- E. $\frac{2}{\sqrt{17}}(3\underline{i} + 2\underline{j} - 2\underline{k})$

Question 8

The graph of the function $f : [0, \infty) \rightarrow \mathbb{R}$, $f(x) = \sec(ax)$, $a > 0$ has asymptotes located at

- A. $x = 0, \frac{\pi}{a}, \frac{2\pi}{a}, \frac{3\pi}{a}, \dots$
- B. $x = 0, \frac{\pi}{2a}, \frac{3\pi}{2a}, \frac{5\pi}{2a}, \dots$
- C. $x = \dots, \frac{-5\pi}{2a}, \frac{-3\pi}{2a}, \frac{-\pi}{2a}$
- D. $x = \frac{\pi}{2a}, \frac{3\pi}{2a}, \frac{5\pi}{2a}, \dots$
- E. $x = \frac{\pi}{a}, \frac{2\pi}{a}, \frac{3\pi}{a}, \dots$

Question 9

For $\frac{-\pi}{2} < x < \frac{\pi}{2}$, the graphs of the two curves given by $y = \operatorname{cosec}^2(x)$ and $y = 2|\cot(x)|$ intersect at

- A. the point $\left(\frac{\pi}{4}, 1\right)$ only
- B. the two points $\left(\frac{-\pi}{4}, 2\right)$ and $\left(\frac{\pi}{4}, 2\right)$
- C. the point $\left(\frac{-\pi}{4}, -2\right)$ only
- D. the point $\left(\frac{\pi}{4}, 2\right)$ only
- E. the two points $\left(\frac{-\pi}{6}, 1\right)$ and $\left(\frac{\pi}{6}, 1\right)$

Question 10

Given that $z = 2 \operatorname{cis}\left(\frac{\pi}{3}\right)$ and $w = 5 \operatorname{cis}\left(\frac{-\pi}{6}\right)$, it follows that $\operatorname{Arg}\left(z^3(\bar{w})^4\right)$ is

- A. $-\pi$
- B. $\frac{2\pi}{3}$
- C. $\frac{5\pi}{3}$
- D. $\frac{-\pi}{3}$
- E. $\frac{\pi}{3}$

Question 11

If $z_1 = \sqrt{3} + i$ and $z_2 = 1 - i$, then $\frac{z_1}{z_2}$ is equal to

- A. $\sqrt{2} \operatorname{cis}\left(\frac{5\pi}{12}\right)$
- B. $\sqrt{2} \operatorname{cis}\left(\frac{\pi}{12}\right)$
- C. $\frac{1}{\sqrt{2}} \operatorname{cis}\left(\frac{5\pi}{12}\right)$
- D. $\frac{1}{\sqrt{2}} \operatorname{cis}\left(\frac{\pi}{12}\right)$

Question 12

The shaded region on the Argand diagram above can be described by

- A. $\left\{z : \text{Arg}(z) > \frac{\pi}{3}\right\} \cup \{z : |z| \leq 2\}$
- B. $\left\{z : 0 < \text{Arg}(z) < \frac{2\pi}{3}\right\} \cup \{z : |z| \leq 2\}$
- C. $\left\{z : 0 < \text{Arg}(z) < \frac{2\pi}{3}\right\} \cap \{z : |z| \leq 2\}$
- D. $\left\{z : 0 \leq \text{Arg}(z) < \frac{2\pi}{3}\right\} \cap \{z : |z| < 2\}$
- E. $\left\{z : 0 \leq \text{Arg}(z) < \frac{2\pi}{3}\right\} \cap \{z : |z| \leq 2\}$

Question 13

On an Argand diagram, a set of points that lie on a circle of radius 4 centred at (1, 0) is

- A. $\{z : (z-1)(\bar{z}-1) = 16\}$
- B. $\{z : (z-1)^2 = 4\}$
- C. $\{z : (z-1)(\bar{z}-1) = 4\}$
- D. $\{z : z\bar{z} = 4\}$
- E. $\{z : (\text{Re}(z))^2 + (\text{Im}(z))^2 = 4\}$

Question 14

If $f'(t) = e^{t^2}$ and $f(0) = 3$, then the solution to the differential equation when $t = 2$ can be found by evaluating

- A. $\int_0^2 e^{t^2} \cdot dt + 3$
- B. $\int_0^2 e^{t^2} \cdot dt - 3$
- C. $\int_0^2 2te^{t^2} \cdot dt + 3$
- D. $\int_0^2 (e^{t^2} + 3) \cdot dt$
- E. $\int_0^3 e^{t^2} \cdot dt - 2$

Question 15

Given $\frac{dy}{dx} = \frac{2x}{y+2}$ and $(x_0, y_0) = (1, 2)$.

Using Euler's rule with a step size of 0.2, the value of y_2 , correct to 3 decimal places, is

- A. 2.100
- B. 2.060
- C. 2.200
- D. 2.217
- E. 2.211

Question 16

The temperature inside a kitchen is 22°C . A cup of soup is removed from the microwave and stirred evenly when its temperature is 70°C . The rate at which the temperature of the soup drops is proportional to the excess of its temperature above its surrounding air temperature.

If T is the temperature of the soup at time t minutes after it is removed from the microwave and k is a positive constant, a differential equation relating T and t is

- A. $\frac{dT}{dt} = k(T - 22), T(0) = 70$
- B. $\frac{dT}{dt} = k(T - 70), T(0) = 22$
- C. $\frac{dT}{dt} = -k(T - 70), T(0) = 22$
- D. $\frac{dT}{dt} = -kT - 22, T(0) = 70$
- E. $\frac{dT}{dt} = -k(T - 22), T(0) = 70$

Question 17

Two particles, A and B , move from the same point in a straight line with their respective velocities $V_A = f(t)$ and $V_B = g(t)$ in m/s, where t is in seconds and $t \geq 0$. The velocity-time graphs for the particles is shown above.

At $t = 50$ seconds, the distance, in metres, between the two particles is

- A. $\left| \int_0^{50} g(t) \cdot dt - 50 f(t) \right|$
- B. $\left| \int_{20}^{50} g(t) \cdot dt - \int_0^{20} g(t) \cdot dt - 50 f(t) \right|$
- C. $\left| \int_{20}^{50} g(t) \cdot dt - \int_0^{20} g(t) \cdot dt - 50 f(t) \right|$
- D. $\left| \int_{30}^{50} g(t) \cdot dt + \int_0^{30} g(t) \cdot dt - 50 f(t) \right|$
- E. $\left| \int_0^{50} (g(t) - f(t)) \cdot dt \right|$

Question 18

Using an appropriate substitution, $\int_0^{\frac{\pi}{3}} \cot(x) \sec^2(x) \cdot dx$ can be expressed as

- A. $\int_0^{\frac{1}{2}} \frac{du}{u}$
- B. $\int_0^{\sqrt{3}} \frac{du}{u}$
- C. $\int_0^{\frac{\sqrt{3}}{2}} \frac{1-u^2}{u} \cdot du$
- D. $-\int_0^{\sqrt{3}} u \cdot du$
- E. $\int_0^{\sqrt{3}} u \cdot du$

Question 19

A mass is travelling in a straight line at 6 m/s and has a momentum 24 kg m/s. A force acts on the mass in the same direction of motion so that the acceleration of the mass is 0.25 m/s^2 .

When it has a momentum of 32 kg m/s, the mass has travelled a distance of

- A. 14 metres
- B. 96 metres
- C. 24 metres
- D. 28 metres
- E. 56 metres

Question 20

A mass of m_1 kg rests on a rough horizontal surface and is connected to a second mass m_2 kg, which is twice the mass of m_1 . The second mass, m_2 , rests on a rough surface inclined at an angle of 30° to the horizontal. The two masses are connected by a light, inextensible string that passes over a smooth pulley. The coefficient of friction between each mass and their surface is the same. The mass m_2 is on the verge of sliding down the plane.

The value of the coefficient of friction μ is

- A. $\frac{1}{\sqrt{3} - 2}$
- B. $\frac{1 + \sqrt{3}}{2}$
- C. $\frac{1}{1 + \sqrt{3}}$
- D. $\frac{2}{\sqrt{3} - 1}$
- E. $\frac{1}{1 - \sqrt{3}}$

Question 21

An object moves in a straight line with velocity, in m/s, $v = \frac{4}{t+1}$, $t \geq 0$.

Which one of the following statements about the object's motion is **false**?

- A. The object's acceleration is always negative.
- B. The object has an initial acceleration of $\square 4 \text{ m/s}^2$.
- C. The distance travelled by the object in the first 3 seconds of motion is $4 \log_e 4$ metres.
- D. The object has an initial velocity of 4 m/s.
- E. The object gradually increases its non-zero initial velocity.

Question 22

A crane of length 20 metres makes an angle of θ radians with the horizontal ground as it is being raised. The height of the end of the crane above the ground is h metres.

The crane is being raised at a rate of 0.08 radians/second. The rate at which the height of the crane is increasing when $\theta = \frac{\pi}{4}$ is

- A. $\frac{4\sqrt{2}}{5}$ m/s
- B. $\frac{\sqrt{2}}{5}$ m/s
- C. $\frac{8\sqrt{2}}{5}$ m/s
- D. $\frac{2\sqrt{2}}{5}$ m/s
- E. $\frac{8}{5}$ m/s

END OF SECTION 1

END OF SECTION 1

Section 2

Instructions for Section 2

Answer **all** questions in the spaces provided.

A decimal approximation will not be accepted if an **exact** answer is required to a question.

In questions where more than one mark is available, appropriate working **must** be shown.

Unless otherwise indicated, the diagrams in this book are **not** drawn to scale.

Take the **acceleration due to gravity** to have magnitude $g \text{ m/s}^2$, where $g = 9.8$.

Question 1

In the triangle below $\vec{OA} = \underline{a}$, $\vec{OB} = \underline{b}$ and $|\underline{b}| = 2|\underline{a}|$.

- a. If $\underline{a} \cdot \underline{b} = a^2$, find the size of $\angle AOB$.

2 marks

- b. Express $\vec{AB}$ in terms of $\underline{a}$ and $\underline{b}$.

Hence use a vector method to show that $\angle OAB$ is equal to 90° .

2 marks

SECTION 2 – Question 1 – continued

TURN OVER

- c. If M is the midpoint of $\vec{OB}$, express $\vec{MA}$ in terms of $\vec{a}$ and $\vec{b}$. **Hence** use a vector method to show that triangle OAM is equilateral.

2 marks

Three points P , Q and R , have their respective coordinates given by $(0, 1, 1)$, $(1, 3, -1)$ and $(2, 2, 5)$.

- d. Find the coordinates of a point M on $\vec{PR}$ that is closest to the point Q .

4 marks

Total $2 + 2 + 2 + 4 = 10$ marks

SECTION 2 – continued

Question 2

A relaxation bath is 1 metre long and has a semi-circular cross-section of radius 1 metre, as shown below.

AB is the diameter of the semi-circle, the angle $DOC = \alpha$ radians and h is the depth of water in the bath.

- a. Show that the height of water in the bath is $h = 1 - \cos\left(\frac{\alpha}{2}\right)$.

1 mark

- b. Show that the volume of water in the tank is $V = 0.5(\alpha - \sin \alpha)$.

1 mark

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

d. When there is 2000 litres of pure water in the bath, an Epsom salt solution of concentration 0.08 kg per litre is pumped in at a rate of 50 litres per minute. The mixture is kept uniform and at the same time the bath is drained at a rate of 50 litres per minute.

ii. Show that $\frac{dx}{dt} = \frac{160-x}{40}$, where x is the amount of Epsom salt in the bath after t minutes.

SECTION 2 – Question 2 – continued

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page, typical of notebook paper or a template for writing. There are no margins, text, or other markings on the page.

1+1+3=5 marks

-
-

Total 1+1+4+5+1=12 marks

Year 12 Trial Exam – Specialist Mathematics Unit 4—Copyright © Insight Publications 2011

Question 3

The position vector of a particle at any time $t \geq 0$ is $\vec{r}(t) = t\vec{i} + \tan^{-1}\left(\frac{t}{2}\right)\vec{j}$.

- a.** Determine the Cartesian equation of the path of the particle.

1 mark

- b.** Sketch the graph on the set of axes below, labelling any asymptotes and the coordinates of any end points.

2 marks

- c. i.** On the same set of axes given in part **b**, shade the area between the graph, the x -axis and the line $x = 2$.

1 mark

- ii. Use Calculus to determine the exact area between the graph, the x -axis and the line $x = 2$. Express your answer in the form $a + \log_e b$, where $a, b \in R$.

[illegible]

4 marks

1+4 = 5 marks

- d. Use Calculus to determine the exact volume generated when the area between the graph, the x -axis and the line $x = 2$ is rotated around the y -axis.

3 marks

- e. A normal line to the curve intersects with the x -axis at $x = 2\sqrt{3} + \frac{\pi}{24}$. Find the coordinates of the point on the curve through which this normal line passes. Give your answer correct to 3 decimal places.

4 marks

Total $1 + 2 + 5 + 3 + 4 = 15$ marks

Question 4

A curve in the complex plane has its rule given by

$$T = \{z : |z - 5| - |z - 1| = 2, z \in \mathbb{C}\}$$

- a. Show that the points $z=2$ and $z=1+3i$ belong to T .

[illegible]

2 marks

- b.** Find the exact values of b if $z = bi$ also belongs to T .

[illegible]

2 marks

- c. Sketch the graph of T on the complex plane below. Clearly show all axes intercepts.
(Do not show any asymptotes.)

2 marks

Question 5

Daredevil Park has a waterslide into a deep pool. The 12.5 metre slide is inclined at 30° to the horizontal and the bottom of the slide is 3.5 metres above the water surface of the pool.

Albert, who is of mass m kg, positions himself on the slide at the top and is supported by his friend Charlie. When the applied force acting directly up the slide is $12g$ newtons, Albert is on the verge of moving down the slide. The coefficient of friction between Albert and the slide is $\frac{\sqrt{3}}{5}$. The situation is shown on the diagram below.

- a. i. On the diagram above, label all the forces acting on Albert while he is being held at the top of the slide.

1 mark

- c. Show that Albert reaches the end of the slide with a speed of 7 m/s.

1 mark

Take the bottom end of the slide as the origin, $\underline{i}$ as the unit vector horizontally to the right and $\underline{j}$ as the unit vector vertically up.

- d. Find the velocity vector $\underline{v}(t)$ which represents the velocity of Albert t seconds after he leaves the slide.

2 marks

- e. Calculate Albert's speed 0.5 seconds after he reaches the bottom of the slide.
Give your answer to the nearest tenth of a second.

2 marks
Total $4 + 3 + 1 + 2 + 2 = 12$ marks

END OF SECTION 2

END OF QUESTION AND ANSWER BOOK
