

Asexual reproduction

Types of asexual reproduction

- Fission
- Budding
- Vegetative propagation
 - Spore formation
 - Cloning

Advantages of asexual reproduction

- Only needs one parent
 - Fast
- Can produce large numbers
 - Energy efficient

Disadvantages of asexual reproduction

- Genetically identical offspring
- Promotes competition for resources
- Not suited to a changing environment
 - Not much fun!

Cloning in horticulture

Cloning using embryo transplants

Cloning (SCNT)

Human Cloning?

"Holy great mother of God, I've been cloned!"

**HUMAN
CLONING
IS CLOSER
THAN YOU
THINK**

For couples who can't have a child—
or who have lost one—the unthinkable
may soon be possible. **Here are the perils**
